

FENDER

carboncraft.

The synergy between yacht and fender design sets a new standard for unity, where form and function unite to deliver unparalleled aesthetics and functionality on the open seas.

carboncraft's innovative design seamlessly integrates a handle for optimal handability and aesthetics. This thoughtful feature enhances the fender's maneuverability, making it easy to handle while seamlessly integrating with the overall design and maintaining a sleek and minimalist profile. The result is a combination of elegance and practicality, where carboncraft's fenders not only protect superyachts but also reflect their unique design.
